

RESEARCH METHODS IN CONSTITUTIONAL LAW: A HANDBOOK

*David S. Law & Malcolm Langford eds.,
Edward Elgar Publishing (forthcoming 2019)*

TABLE OF CONTENTS - DRAFT 12/3/18 1:24 PM

FUNDAMENTALS OF RESEARCH METHODOLOGY

1. Introduction
David Law (WUSTL & HKU) & Malcolm Langford (University of Oslo)
2. Conceptualisation and measurement
Mat McCubbins & Jack Knight (Duke University) & Jonathan Katz (CalTech)
3. Sampling and case selection
Katerina Linos & Melissa Carlson (UC Berkeley)
4. Causal inference
Chris Whytock (UC Irvine)
5. Comparison
Jaakko Husa (University of Helsinki)
6. Methodological pluralism
Malcolm Langford (University of Oslo)
7. Epistemology
Tom Ginsburg (University of Chicago)

INTERDISCIPLINARY APPROACHES

8. Socio-legal approaches
Mikael Rask Madsen (University of Copenhagen)
9. Historical approaches
Jack Rakove (Stanford University)
10. Economic and public choice approaches
Michael Gilbert (UVA) & Robert Cooter (UC Berkeley)
11. Philosophical approaches
Paul Gowder (University of Iowa)
12. Institutionalist approaches
Mark Graber (University of Maryland)

QUALITATIVE METHODS

13. Archival research
Eirik Holmøyvik (University of Bergen) and Dag Michalsen (University of Oslo)
14. Doctrinal scholarship
Alex Schwartz (University of Hong Kong)
15. Interview fieldwork & observational methods
Siri Gloppen (University of Bergen) & Rachel Sieder (CIESAS)
16. Medium-N methods
Tom Keck (Syracuse University)

QUANTITATIVE AND FORMAL METHODS

17. Databases for studying constitutional law
Lee Epstein, Andrew Martin & James Gibson (WUSTL & University of Michigan)
18. Quantitative analysis of constitutional drafting
Stefan Voigt (University of Hamburg)
19. Quantitative analysis of judicial voting
Benjamin Alarie & Andrew Green (University of Toronto)
20. Quantitative analysis of electoral systems
Simon Jackman (University of Sydney)
21. Game theory and formal modeling
John Ferejohn (NYU)
22. Experimental research
David Fontana (George Washington University)

COMPUTATIONAL METHODS

23. Automated content analysis
Brandon Stewart (Princeton University)
24. Machine learning
Albert Yoon & Anthony Niblett (University of Toronto)
25. Network science & AI
Dan Katz (Michigan State)
26. Evolutionary dynamics
Daria Roithmayr (USC)
