(Promulgated by Decree No.5 of the State Planning Commission,
the State Economic and Trade Commission and the Ministry of
Foreign Trade and Economic Cooperation on June 20, 1995)

ENCOURAGED PROJECTS FOR FOREIGN INVESTMENT 2

I. Agriculture, Forestry, Animal Husbandry, 3

Fishing and Related Industries 4

1. The reclamation and development of wastelands, barren hills and shoals (except where there are military installations) and transformation of medium and low-yield farm lands and low-yield forests; 5
2. The development of new high-quality, high-yield strains of food grains, cotton, oil crops, sugar crops, vegetable, flowers and plants, and forage grass crops; 6
3. Serial non-soil cultivation and production of vegetables and flowers and plants; 7
4. Forest plantation and the introduction of improved varieties of forest trees; 8
5. Development of fine breeds of stud stock, birds, and aquatic products (not including China's indigenous precious fine varieties); 9
6. Breeding of famous, special or fine aquatic products and deep-water fishing; 10
7. New lines of highly efficient and safe crude agricultural chemicals (which have a pest-killing and bacteria-killing rate of up to 80% and do not harm human beings, animals and crops); 11
8. High-concentration chemical fertilizers (urea, synthetic ammonia and phosphamidon)*; 12
9. New production technology and new kinds of agricultural plastic film (fiber film, photolysis film and multi-function film and raw materials); 13
10. Veterinary antibiotics (special animal antibiotics, veterinary antibiotics against internal and external parasites, new forms of veterinary antibiotics), veterinary anthelmintics; 14
11. All-valence compound fodder, additives and the development of fodder protein resources; 15
12. New technology and equipment for the storage, preservation and processing of vegetables, fruits, meat products and aquatic products; 16
13. Forestry chemical products and new technology for the comprehensive utilization of inferior, small and fuel forests and new products there from?. 17
14. The construction and management of comprehensive water control projects (where the State commands the majority of shares and with more than 300,000 tonnes of daily water supply or with installed capacity of more than 250MW); 18

15. The manufacture of water-saving irrigation equipment;	19
16. Agricultural machinery, agricultural tools and related spare parts.	20
II. Light Industry	21
1. Mold design, processing and manufacture of non-metal products;	22
2. Commercial-grade paper pulp;	23
3. Post dressing and processing of leather;	24
4. Mercury-free manganese-alkaline batteries, lithium batteries and hydronickelate batteries;	25
5. High-tech special industrial sewing machines;	26
6. Polyimide wrap;	27
7. Enzyme products, synthetic detergent raw materials (straight-chain aldybenzene);	28
8. Synthetic spices and single-ion spices;	29
9. Research and popularization of freon substitution technology.	30
III. Textile Industry	31
1. Chemical fibers with such modified properties as being ultra-thin, electrostatic-resistant, fire-retarding and high emulation; special chemical fibers such as aryl, spandex and carbon fiber;	32
2. Textile dyeing and after-treatment;	33
3. Highly simulated chemical fiber and fabrics;	34
4. Oils used in textile industries;	35
5. Special industrial textile products.	36
IV. Transport, Post and Communications Industry	37
1. Railway transport technology and equipment: design and manufacture of locomotives and their major parts; rail-line design and construction; technology and equipment manufacturing for fast railways; communication signals and transport safety monitoring equipment manufacturing; electrical-powered railway installation and equipment manufacturing;	38
2. Construction and management of local railways and associated bridges, tunnels and ferries (off limits to solely foreign-funded enterprises);	39
3. Road and port machinery and its design and manufacture technology;	40
4. Construction and management of urban subway and light-duty rail system (where	41

the State should command the majority of shares);

5. Construction and management of roads, bridges, tunnels and ports (the State shall command the majority of shares in public ports projects); 42

6. Construction and management of civil airports (where the State shall command the majority of shares); 43

7. Manufacture of 900-MHz digital mobile communication equipment; 44

8. Synchronous opticfiber of more than five time-groups, microwave communication systems and measurement equipment manufacturing; 45

9. Manufacture of asynchronous transfer mode (ATM) exchange equipment. 46

V. Coal Industry 47

1. Design and manufacture of coal mining, excavation and transportation machinery; 48

2. Design and manufacture of complete sets of gasification equipment; 49

3. Manufacturing equipment and additives for high concentration liquid coal; 50

4. Comprehensive utilization and development of fuels with low calorific value and associated resources; 51

5. Comprehensive development and utilization of coal. 52

VI. Power Industry 53

1. Construction and management of thermal power plants (including conventional thermal power plants and power plants that utilize antipollution coal-burning technology); 54

2. Construction and management of hydropower stations (the State shall command the majority of shares in those stations with more than 250MW of installed capacity); 55

3. Construction and management of nuclear power stations (where the State shall command the majority of shares); 56

4. Construction and management of power stations utilizing new types of energy (including solar energy, wind energy, magnetic energy, geothermal energy and tidal energy). 57

VII. Ferrous Metallurgical Industry 58

1. Sponge iron (using coal as reductant); 59

2. Powder metallurgy (iron powder); 60

3. Short-process steel and iron production lines of more than 200,000 tonnes; steel and iron production lines of more than 500,000 tonnes; 61

4. Cold-rolled silicon steel plates, galvanized plates, tinned plates and stainless steel plates; 62
5. Hot-and cold-rolled slit plates; 63
6. Bushed steel bearings, steel oil pipes, stainless steel pipes and high-pressure boiler pipes; 64
7. Tires and nave bosses of locomotives and vehicles; 65
8. Super-high power electrodes, spicule coke; 66
9. Aluminum alumine, hard clay pit and grog; 67
10. Iron ore mining and dressing; 68
11. Deep processing of tamping coke and coal tar; 69
12. Ultra-pure magnesium dust (off limits to solely foreign-funded enterprises); 70
13. High grade special refractory materials for continued casting, ladle and combined blow; special protective cinder. 71

VIII. Non-Ferrous Metallurgical Industry 72

1. Single- (more than 5 inches in diameter) and multi-crystal silicon; 73
2. Hard alloy, chemical tin compound, chemical stibium compounds; 74
3. Compound materials of non-ferrous metals, new alloy materials; 75
4. Exploitation of copper, lead and zinc mines (off limits to solely foreign-funded enterprises); 76
5. Exploitation of aluminum mines (off limits to solely foreign-funded enterprises) and aluminum oxide (more than 300,000 tonnes); 77
6. Rare-earth minerals application. 78

IX. Petroleum, Petrochemical and Chemical Industry 79

1. Ionic membrane caustic soda and new organic chlorine product series; 80
2. Manufacture of caustic soda ion membrane; 81
3. Ethylene (with an annual production of more than 300,000 tonnes), acrylics and the comprehensive utilization of C4-C9 products; 82
4. Engineering plastic products and plastic alloys; 83
5. Synthetic rubber (liquid styrene-butadiene rubber, butyl rubber, isoprene rubber, acetyl propionyl rubber, butadiene flange duprene rubber, lactoprene rubber, acrylic rubber and alcoholate fluoride rubber); 84
6. Fine chemical industry: dyes, intermediates, catalysts, auxiliaries and new color 85

products and new technology; commercial processing technology of dyes and colors; high tech chemical products for electronics and paper-making; food additives, fodder additives, leather chemical products, oil field auxiliaries, surfactant, water treatment agents, glues, non-organic fibres, non-organic dust fillings and equipment;

7. Chloride flange phthaleins vanish; 86
8. Chemical products that use coal as raw material; 87
9. Necessary raw materials for synthetic materials (bisphenol A, butadiene-styrene latex, pyridine, 4.4 diphenyl methane diisocyanic ester); 88
10. Basic chemical raw materials: comprehensive utilization of benzene, methylbenzene, para-xylol derivatives, ortho-xylol derivatives and meta-xylol derivatives; 89
11. Comprehensive recycling of waste gas, liquid and residue; 90
12. Construction and management of oil and gas pipes, oil depots and ports designated for oil transportation (where the State shall command the majority of shares). 91

X. Machinery Industry 92

1. Manufacture of welding robots and highly-efficient welding production lines; 93
2. Heat-resistant insulating materials (with the F and H insulating grades) and finished insulating products; 94
3. Manufacture of continued milling machines for slit plates, large cold-and hot-rolling equipment and gasification furnaces for urban supply and antipollution industrial use; 95
4. Manufacture of trackless collection, loading and transport equipment for underground mines; motorized selfloading-and-unloading mining vehicles that can handle more than 100 tonnes of load; mobile crushers; double-in double-out coal grinders; bucket-wheel excavators with speed higher than 3000 cubic meters per hour; mining loaders of more than 5 cubic meters; whole-section tunneling machines; 96
5. Manufacture of container loading and unloading bridge and tubular conveyer; 97
6. Manufacture of complete sets of large air-separation equipment with the capacity of more than 30,000 cubic meters (including 30,000 cubic meters); 98
7. Manufacture of multi-color offset printing machines; 99
8. Manufacture of onshore and offshore oil drilling and extraction equipment of more than 4,500 meters; antiblowout apparatus of more than 70-million-Pascal (including 70 million Pascal); fracturing equipment of more than 105 million Pascal (including 105 million Pascal); well-building machines of more than 50 tonnes (including 50 tonnes); 100
9. Manufacture of complete sets of turbine compressors, aminomethane pumps and mixer-guarantors used in synthetic ammonia projects with annual production of more than 300,000 tonnes (including 300,000 tonnes), in urea projects with annual production of more than 480,000 tonnes (including 480,000 tonnes); in ethylene projects with 101

annual production of more than 300,000 tonnes (including 300,000 tonnes) (the State shall command the majority of shares in the projects);

10. Manufacture of complete sets of electronics, new spinning machines and new paper-making (including paper pulp) machines; 102
11. Manufacture of large and precision measurement equipment; 103
12. Safety monitoring and checking equipment (for detection of vibration, noise, poisonous matters, dust concentration and predition* of gas outburst and shock bump); 104
13. Components and spare parts of new types of instruments and materials (mainly referring to intelligent instrument sensors, instrument socket connectors, flexible circuit boards, photoelectron switches, proximity switches and other new types of switches; instrument functional materials); 105
14. Manufacture of large, highly-efficient numerical controlled precision machine tools and their functional parts. 106
15. Hydraulic components, pneumatic components and sealing elements; 107
16. Fine punching molds, precision hollow molds and standardized molds; 108
17. Manufacture of urban sewage treatment equipment that can handle 250,000 tonnes of sewage per day; industrial liquid waste membrane treatment equipment; up-flowing anaerobic fluidized bed equipment and other organic liquid waste treatment equipment, coal ashes building blocks equipment (50,000-100,000 tonnes per year), waste plastics recycling equipment, industrial boiler desulphurization and identifications equipment, large heat-and acid-resistant bag-type collectors; 109
18. Manufacture of large road construction equipment; 110
19. Manufacture of large (200-430 mm in external diameter), precision and special hearings; 111
20. Manufacture of major automobile components and spare parts: brake assembly, driving assembly, gearbox, steering gear, diesel engine fuel pump, piston (including piston ring), air valve, hydraulic tappet, axle pad, booster, clarifying filter (triple filter), aluminum radiator, diaphragm clutch, constant-velocity universal joint, shock absorber, car air conditioning system, safety air bag, seat angle adjusting device, car lock, rear-view mirror, glass lift, combined dashboard, engines, lamps and bulbs, special high-strength fasteners, special bearings; 112
21. Manufacture of automobile molds (including punching molds, injection molds, pressed molds), clamping apparatus (including welding fixture and examination fixture); 113
22. Automobile casting and forging blanks; 114
23. Automobile technology research centers and automobile design and development institutions; 115
24. Highly-specialized vehicles such as those used in airports and in deserts in petroleum industry. 116

XI. Electronics Industry	117
1. Production of large-scale integrated circuits;	118
2. New types of electronic components and spare parts (including sectional components) and power electronic components and spare parts;	119
3. Manufacture of photoelectric components and parts, sensitive components and parts, sensors;	120
4. Manufacture of medium and large computers;	121
5. Manufacture of top-end 32-bit plus (not including 32-bit) micro-computers;	122
6. The manufacture of key components of fax machines (heat-sensitive printing heads, image sensors, etc.);	123
7. Digital cassette recorders and laser disc apparatus compatible with digital television and HDTV;	124
8. Semiconductor and photoelectric materials;	125
9. New types of display devices (color liquid crystal devices, flat panel display devices);	126
10. Computer aided design (CAD), computer aided tests (CAT), computer aided manufacture (CAM), computer aided engineering (CAE) systems and other computer application systems;	127
11. Manufacture of special electronic equipment, instruments, tools and molds;	128
12. Manufacture of hydrologic data collection instruments and equipment;	129
13. Manufacture of satellite communications telephone earth stations (TES) and personal earth stations (PES) and key components;	130
14. Manufacture of SDH optical communications systems, cross connection equipment and network management systems;	131
15. Development and production of (computer and communications) software;	132
16. Manufacture of air traffic control system equipment;	133
17. Development and manufacture of large capacity laser disk and magnetic disk storage and related components;	134
18. Development and manufacture of new types of printing devices (laser printers, etc.)	135
XII. Building Materials and Equipment and	136
Other Non-Metallic Minerals Industries	137
1. Float glass production lines with daily melting output of 500 tonnes or more;	138

2. High-grade sanitary ceramics production lines with annual output of 500,000 pieces;	139
3. New types of building materials;	140
4. Special cement;	141
5. Cement additives;	142
6. Storage and transport facilities for bulk cement;	143
7. Manufacture of special urban sanitary equipment;	144
8. Manufacture of tunnel excavators, urban subway entry-driving machines;	145
9. Manufacture of tree transplanting machinery;	146
10. Manufacture of road milling and repairing machinery;	147
11. Glass fiber and glass fiber reinforced plastic products;	148
12. Inorganic, non-metal materials and products;	149
13. Non-metallic mineral deposits and deep processing.	150

XIII. Medical and Pharmaceutical Industries 151

1. Chemical raw materials that are within the patented period under the protection of China's administration; special medical intermediates that need to be imported;	152
2. Antiphlogistics and fever-allaying medicines: new varieties that have good curative effects and have not been produced domestically;	153
3. Vitamins: vitamin D3, dextropantothenic calcium, niacin;	154
4. New types of anti-cancer, cardio-and cerebral-vascular medicines;	155
5. Medicine agents: slow-releasing agents, release controlling agents, targeting agents, skin-penetrating and other new types of forms of medicines and related supplements;	156
6. Amino acids: serine, tryptophan proteinochromogen, histamine, etc.;	157
7. New types of medicine packaging materials, containers and advanced pharmaceutical equipment;	158
8. New types of highly efficient and economic contraceptive medicines and devices that have not been produced domestically;	159
9. New technologies and equipment that can improve the quality of patent traditional Chinese medicines and that can improve the packaging of the medicines;	160
10. New techniques of analyzing traditional Chinese medicine's active agents and extraction;	161
11. New types of medicine manufactured by biological engineering technology.	162

XIV. Medical Equipment	163
1. X-ray machines of more than 800 milliamperes;	164
2. Digital subtraction angiography apparatus;	165
3. Biochemical analysis instrument;	166
4. Electronic endoscopes;	167
5. Medical monitoring instrument;	168
6. Multi-function anesthesia apparatus;	169
7. Medical tubes.	170
XV. Space and Aviation Industries	171
1. Civilian aircraft manufacturing;	172
2. Aircraft engines;	173
3. Airborne equipment;	174
4. Light combustion turbines;	175
5. Civilian satellite manufacturing;	176
6. Manufacture of satellite pay loads;	177
7. Satellite application (the State shall command the majority of shares).	178
XVI. Shipbuilding Industry	179
1. Manufacture and repairing of special ships, high performance ships and ships larger than 35,000 tonnes;	180
2. Manufacture of necessary ship accessories.	181
XVII. New and Developing Industries	182
1. Micro-electronic technology;	183
2. New materials;	184
3. Bioengineering technology;	185
4. Information and communications networking technology;	186
5. Isotope radiation and laser technology;	187
6. Ocean development and oceanic energy development;	188
7. energy-saving technology development;	189
8. Resources regeneration and comprehensive utilization technology;	190
9. Engineering and technology for the control of environmental pollution..	191

XVIII. Service Industry 192

1. International economic and scientific and technological information consultation services; 193
2. Repairing and after-sale services of precision instrument and equipment. 194

PROJECTS RESTRICTED FOR FOREIGN INVESTMENT 195

A 196

I. Light Industry 197

1. Assembling of movements of mechanical and electronic watches and finished watches; bicycles and sewing machines for household use; 198
2. Home appliances: washing machines, refrigerators, freezers; 199
3. Disposable aluminum cans. 200

II. Textile Industry 201

Long polyester fiber with annual production under 5,000 tonnes. 202

III. Coal Industry 203

Local method coke making. 204

IV. Ferrous Metallurgical Industry 205

1. Silicon iron, ordinary carbon electrodes; 206
2. Electric furnace steel processing projects under 30 tonnes; revolving furnace steel processing projects under 30 tonnes; blast furnace smaller than 300 cubic meters and their related sintering and coal carbonization; 207
3. Welded steel pipe of 100 millimeters or thinner, rolling mills, ordinary steel primary rolling mills and rough mills for steel pipes thinner than 76 millimeters. 208

V. Non-Ferrous Metal Industry 209

Aluminum materials and aluminum doors and window frames. 210

VI. Petrochemical and Chemical Industries	211
1. Barium salts, naphthalene flange benzene anhydride;	212
2. Oil refineries smaller than 2.5 million tonnes;	213
3. The renovation of cross-ply, old tires (except meridian tires) and low performance industrial rubber replacements;	214
4. Iodine extraction from kelps.	215
VII. Machinery Industry	216
1. Ordinary long polyester fiber and short fiber equipment;	217
2. Manufacture of ordinary passenger and cargo ships, ship diesel engines and diesel electricity generating sets;	218
3. Processing of carbon silicon* raw materials;	219
4. Power station, electricity-powered grinders;	220
5. Ordinary carbon steel welding rods;	221
6. Ordinary grade standard fasteners, small and medium-small ordinary bearings;	222
7. Ordinary lead acid batteries;	223
8. containers;	224
9. Elevators.	225
VIII. Electronics Industry	226
1. Radio cassette recorders, radios;	227
2. Black-white television sets and black-white kinescopes;	228
3. Computers below 16-bits (including 16-bits)	229
4. Wireless telephone systems under 450 MHz;	230
5. Broadcast and television transmitting systems.	231
IX. Building Materials and Equipment and Other Non-Metallic Mineral Industries	232
1. Cement production lines with annual output of less than 300,000 tonnes;	233
2. Ordinary building plate glass production lines with daily melting output lower than 200 tonnes.	234

X. Medical and Pharmaceutical Industry	235
1. Antibiotics: chloromycetin, lincomycin, gentamicin and dihydrostreptomycin;	236
2. Synthetic chemical medicines: anlagin, vitamin B1, vitamin B6;	237
3. Traditional Chinese medicine decoction (except traditional preparation techniques);	238
4. Traditional Chinese medicine products and semi-finished products.	239
XI. Medical Devices	240
1. Non-self-destructible disposable syringes;	241
2. Medium and low-grade B ultrasonic imaging devices;	242
3. Electrocardiographs.	243
XII. Service Industry	244
1. Taxi (cars can only be purchased domestically);	245
2. Gas stations (restricted to the construction and management of related projects).	246
B	247
I. Agriculture, Forestry, Animal Husbandry,	248
Fishing and Related Industries	249
1. Processing and export of rare trees and timbers (off limits to solely foreign-funded enterprises);	250
2. Aquatic fishing in offshore and inland waters (off limits to solely foreign-funded enterprises).	251
II. Light Industry	252
1. Table salt, industrial salt;	253
2. Foreign brand non-alcoholic beverages (including solid drinks);	254
3. Famous brand white spirit;	255
4. Cigarette diacetin cellulose and tows;	256
5. Tobacco processing industries such as those in the manufacture of cigarettes and filters;	257
6. Processing and production of pig, ox and goat hides;	258
7. Natural spices.	259

III. Textile Industry	260
1. Wool and cotton spinning;	261
2. raw silk and blank silks;	262
3. Chemical fibers and their raw materials (polyester, acrylnitrile, caprolactam, nylon 66 salts, etc.).	263
IV. Coal Industry	264
1. Extraction of coking coals (off limits to solely foreign-funded enterprises).	265
V. Non-Ferrous Metal Industry (Off Limits to Foreign-Funded Enterprises)	266
1. Copper processing;	267
2. Extraction, dressing, smelting and processing of precious metal ores (gold, silver, platinum);	268
3. Extraction of non-ferrous metal ores such as wolfram, tin and stibium;	269
4. Rare earth extraction and smelting.	270
VI. Petrochemical and Chemical Industries	271
1. Color and black and white film;	272
2. Extraction and processing of ludwigite;	273
3. Strontiam salts;	274
4. Benzidine.	275
VII. Machinery Industry	276
1. Whole cars (the State shall command the majority of shares);	277
2. Whole motorcycles (the State shall command the majority of shares);	278
3. Whole light vehicles (light passenger vehicles, vans) (the State shall command the majority of shares);	279
4. Automobile and motorcycle engines (the State shall command the majority of shares);	280
5. Automobile air-conditioning compressors, electronically controlled fuel injection system;	281
6. Renovation, dismantling and reassembling of old cars and motorcycles;	282
7. Compressors for air conditioners and refrigerators (excluding those used in automo-	283

- bile air conditioners) with power of 2 kilowatts or less;
8. Decentralized control systems (including programmable controllers); 284
9. Desktop electrostatic copiers; 285
10. Thermal power generation equipment: manufacture of generation set (generators, steam turbines, boilers, auxiliaries and control devices)of 100MW or above; combustion turbines combined circulating power generating equipment; circulating fluidized bed boilers; gasification combined circulatory technology and equipment (IGCC), pressurizing fluid bed (PFBC); desulphurization and denitrification equipment (off limits to solely foreign-funded enterprises); 286
11. Hydropower equipment: manufacture of hydropower sets (including hydropower auxiliary equipment and control devices) with runners of 5 meters in diameter and larger; large pumped storage generating sets of 50MW or larger; tubular turbine generating sets of 10MW or larger (off limits to solely foreign-funded enterprises); 287
12. Nuclear power generation sets: manufacture of generation sets of 600MW or larger (off limits to solely foreign-funded enterprises); 288
13. Power transmission and conversion equipment: transformers of 220,000 volts or above, high-voltage switches, mutual-inductors and the manufacture of cable equipment (off limits to solely foreign-funded enterprises). 289

VIII. Electronics Industry 290

1. Color television sets and tuners, remoter controllers, flyback transformers; 291
2. Color kinescopes and glass shells; 292
3. Camcorders (including camcorder-recorders), video recorders; 293
4. Video recorder magnetic heads, drums and movements; 294
5. Emulated mobile communications system (comb, trunk, pagers, wireless telephones); 295
6. Facsimile machines; 296
7. Satellite television receivers and key components; 297
8. Microwave relay communications equipment below 4 time group. 298

IX. Building Materials and Equipment and Other Non-Metallic Mineral Industries 299

- Exploration, extraction and processing of precious non-metal minerals such as diamonds and other natural gem stones (off limits to solely foreign-funded enterprises). 300

X. Medical Industry	301
1. Traditional Chinese medicines administrated by the export licensing system;	302
2. Narcotic precursors: ephedrine, pseudoephedrine, ergobasine, ergotamine, lysergic acid;	303
3. Penicillin G, artemisinin anti-malaria drugs;	304
4. Addictive narcotics and psychotropic drugs;	305
5. Vitamin C;	306
6. Blood products.	307
XI. Transportation, Post and Telecommunications Industries	308
1. Construction and management of arterial railways (the State shall command the majority of shares);	309
2. Overwater* transportation (off limits to solely foreign-funded enterprises);	310
3. Cross-border car transportation (off limits to solely foreign-funded enterprises);	311
4. Aerial transportation (the State shall command the majority of shares);	312
5. Interchangeable aviation (the State shall command the majority of shares in industrial aviation projects; agricultural and forestry aviation projects are off limits to solely foreign-funded enterprises);	313
6. Manufacture of digital program-controlled exchanges.	314
