

LAW STUDENT

Project description:

CELL (Centre on Experimental Legal Learning) at the University of Oslo, applied in April 2019 to be a Centre of Excellence (SFU) and the proposal includes a project to create a Digital Courtroom.

The Digital Courtroom will be the world's first comprehensive digital platform for legal learning. The courtroom would enable law students across Norway to participate in mock disputes and negotiations against each other and AI lawyers. It will be highly scalable and replicable, allowing students to simultaneously participate and engage with AI for single student interaction and automated feedback.

Key responsibilities:

- Help on understanding customer expectations to define the product to be developed.
- Assist the team on defining legal concepts that need to be understood.
- Help on the continuous evaluation of the product and provide feedback.
- Contacting potential interested stakeholders.
- Help reviewing the report that will be delivered in the end of the project.

What we are looking for:

We are looking for a Bachelor or Master student in Law that has a good sense of responsibility willingness to learn and contribute in a project that will set the future of legal education.

What do we offer:

We offer the opportunity to work in a cross functional team together with a Business role, a lawyer role, a software developer/architect a UI designer and a UX designer. This project is going to be under the eye of the Law faculty at the UiO and all their partners, therefore there is a very good opportunity to build up a network for future job opportunities. If the project outcome is successful there will be the possibility to actually develop the final product and in addition to all these amazing things we offer a salary of 7000kr per month for a 3 month contract (September to November).
